

New project manager at Free Energy group

May 2021

Free Energy group is proud to announce that Arvid Nyman, as of 26th of april 2021, has entered the position as Project Manager Scandinavia. Arvid will be responsible for a growing department of technical support, project planning, order management and general support to our installation partners. With his long experience in the solar cell industry, Arvid will also be responsible for training and webinars aimed at solar energy. From his location in Malmö / Lund he is close to the Öresund region, which is an important market for Free Energy.

NEW PROJECT MANAGER:
Arvid Nyman

Arvid Nyman is a civil engineer in industrial economics from The Institute of Technology at Linköping University. Arvid has experience from several swedish industrial companies in automotive technology as well as hydraulics and software. Arvid is a true entrepreneur with a steady number of ongoing projects. In 2017 he established Grön Sol AB focusing on solar cells. Initially Arvid performed installations himself, but the company was sold after 3 years with 10 employees to EONs solar cells activity in southern Sweden. Arvid has a well established name in the solar cell industry and has helped several companies in their start-up with solar cells.

With Arvid's practical and theoretical skills in solar cell energy in particular, but also hybrid panels, Free Energy strengthens its position as a market-leading supplier of solar hybrid solutions that enable climate-neutral buildings on commercial terms.
